

THE LATEST PRODUCT INNOVATIONS FROM RWM!

From the originator and market leader in kingpinless caster products comes an innovative step forward in caster design. RWM Casters is pleased to announce the new Total Lock 65 Series Casters. Now the supreme performance benefits offered by the kingpinless caster design are available in both a locking plate design and a scaffold caster arrangement. Both casters offer significant improvements in shock load safety factor over conventional kingpin casters. Don't trust your life or goods to inadequate casters! Be sure you're using the strongest total lock and scaffolding casters on the market!

RWM Caster's new total lock design is centered around the versatile 65 series caster. These rigs offer more shock, thrust and towing load capacities to ensure safe and stable work environments. Perfect for use in the aerospace production industry where foreign object debris from failed kingpin type casters could spell disaster for work personnel or costly damaged components. An excellent choice where work loads of heavy capacity tooling carts, composite molds or scaffolding must be 100% stationary, providing a stable and reliable work platform.

LS65-RIR-0820-S

Scaffold (Locking Stem) 65 Series

Whl Dia	Whl Wdth	Wheel Type	Cap. (lbs)	Overall Height	Straight Roller	Swivel Lead
8"	2"	Rubber on Iron	500	10 1/8"	LS65-RIR-0820-S	2 1/4"

Custom caster design and assorted options can be arranged from the factory. Please call 1-800-634-7704 for additional information.

Locking Plate 65 Series
